R+E Cycles News • The newsletter of cycling values!

CYCLEPLEX OPENS DECEMBER 10 BIGGER AND BETTER COME SEE 3 STORES UNDER ONE ROOF!!!

Mountain Bike Specialists, Seattle Bike Repair, Second Gear and R+E's Rental store will now be housed in one BIG building, the CYCLEPLEX! We've remodeled the building that housed Second Gear and taken advantage of 10,000 square feet to bring you the best in service, selection and VALUE.

MOUNTAIN BIKE SPECIALISTS will be showcasing the new line of FISHER bicycles as well as the new 1994 BRIDGESTONE and MONGOOSE bicycles. We'll have hand built frames by RODRIGUEZ, FAT CHANCE, and SALSA. MOUNTAIN CYCLES' double suspension bicycle is the talk of the mountain bike magazines and you'll be able to test ride one at Mountain Bike Specialists. Our new space will allow us to carry a complete selection of shoes, clothing and accessories. Come check it out, you'll see why it's the "natural" mountain bike store.

"Service has always been our specialty and now we can provide it in a facility that's fun and exciting to visit!"

enced mechanics using professional tools. We get our hands dirty so that you don't have to.

SECOND GEAR RETURNS. Magic words for many people. Only this time we have even better deals. We'll be offering a more streamlined selection, however we'll have a higher turnover rate of inventory with new bargains coming in even more frequently. Shorts, tights, gloves, jerseys, jackets, headbands, caps, socks, packs, helmets and more. And if you wear "extra small" this is the only place you'll ever want to shop. Come by and find out why.

TO SAVE YOU MORE MONEY'S 2nd Gear keeps prices low by:

- *Purchasing factory over runs
- *Purchasing discontinued styles
- *Minimal sales staff and no phone service

SEATTLE BIKE REPAIR thanks BOEING for its decor. Service has always been our specialty and now we can provide it in a facility that is fun and exciting to visit. Browse through our complete tool selection, peruse our repair books, pick up a copy of our wheel building menu, or schedule a service appointment. We do frame repair and alignment and offer a complete repaint service. Seattle Bike Repair offers the most professional repair by experi-

The **CYCLEPLEX** will also have a complete classroom (blackboard and all!), a library, a well kept bulletin board, used bikes and up to date information on current rides and races. We look forward to seeing you!

R+E CYCLES HAS CLASS

We are expanding our roster of classes to include some riding instruction as well as repair classes. One of the most common topics we are asked about is the subject of tandem riding. There are many myths and misconceptions about the sport of tandem riding and we'd like to show you how easy and fun it can be once you know the tricks and tips.

Our tandem riding classes will include some classroom information and then everyone will have an hour to ride with one of our instructors as well as their chosen partner or another class member. You'll get a chance to ride in both the captain (if you want) and stoker seats, even if that won't be your customary position in the future. Bring your riding clothes, your questions and a lot of enthusiasm.

We have also designed a course for folks who are new to mountain bike riding. Let us teach you how to clear roots, limbs, logs and rocks safely and easily. This class will take place in the park so that you can get a real hands on lesson.

How do you put all of your necessary possessions on your bicycle and go away for a few days, or weeks? We'll teach you some techniques for bicycle touring that

you normally only learn after you've done it the hard way a few times. Make it easy on yourself. Spend 2 hours with us on a Saturday morning and we'll teach you everything you'll want to know about the differences in panniers, efficient ways to make use of your limited space, how to keep your tent from getting moldy and other tips on how to turn your bicycle into a complete RV.

Last but not least are the repair classes. In addition to our vast experience teaching classes, we've spent a lot of time talking to the folks who have taken our classes, talked to the general public about what they'd like in a class and we've even spent time spying on other repair classes. We have tailored our instruction so that you have a small friendly environment for individualized attention. Whether you are learning to change a flat or build a wheel, you'll find that you receive quality instruction that will enable you to achieve your task with ease and confidence.

"We can fix any bike, impossible just takes longer!"

TANDEM RIDERS ARE N.U.T.S.

NORTHWEST UNOFFICIAL TANDEM SOCIETY

R+E Cycles has specialized in tandems since 1973, and now we're the new headquarters for the Northwest Unofficial Tandem Society (The largest group of organized tandem riders in the Northwest). R+E is your source for what's happening in the sport of tandem riding! We are hosting monthly tandem rides with three loops to accommodate all riders; including kid backs, tandems with trailers, as well as "go fast" teams. Upcoming rides will be Saturdays, January 22 and February 19. We will leave R+E at 10:00AM and return at 1:00PM for cake and beverages.

Come in to R+E, or call us at 527-4822, and sign up to be a N.U.T.

IMPORTANT NOTICE TO CANNONDALE OWNERS!!

If you own one of the following Cannondale bicycles, it is subject to a recall because of a defective fork:

1992 M2000, M1000, M800, M700

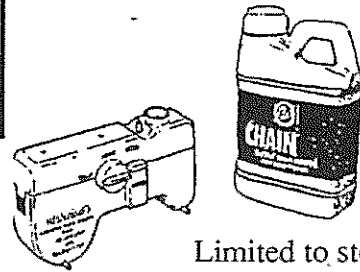

1993 M2000, M1000, M800, M700 M700 police

The Aluminum Steering tubes may develop cracks in the steering tube, hidden from view. Cracks could result in the separation of the fork and loss of control of the bicycle with attendant risk of physical injury to the rider.

STOP USING THE BIKE IMMEDIATELY and bring the bike in for replacement of any aluminum steering tube equipped "Pepperoni" fork.

"CHAIN SHINE MR.?"

Save \$4.00 when you purchase a Park chain cleaner and the solvent as a package for just \$25.00.

IS YOUR BICYCLE STRAIGHT?

We know that it is winter and your bicycle is probably in the closet; get it out...and find out. A frame that is out of alignment can cause a number of problems:

1. It may not steer properly.
2. The frame may cause you to make subtle, unconscious changes to your riding style to accommodate the fault. This can affect your performance and efficiency.
3. Misalignment may affect your chain line and drivetrain in such a way as to cause excessive wear and decreased performance.

R+E's custom frame shop, home of RODRIGUEZ custom frames, features a state of the art Italian alignment table. Our pneumatic, electromagnetic table has a top that is precision ground to a .005mm tolerance, assuring you a perfect alignment that is not achievable by traditional repair shop methods. The table alignment procedure actually aligns the bottom bracket with the same plane of the rest of the tubes. An ordinary alignment merely aligns the rear triangle with the head tube.

After disassembling your bicycle down to the frame and fork we place them on our alignment tables and cold set them to the proper measurements. Afterwards your bicycle is reassembled. In this manner your bicycle also gets a complete overhaul.

How do you know if your frame needs alignment??

Simply bring it in to SEATTLE BIKE REPAIR and we will perform a preliminary alignment check at no charge.

WE INVITE YOU TO JOIN US THE BIRTH OF A BICYCLE

We will be hosting a "TOUR OF THE FRAME SHOP" evening. You'll have a chance to get behind the scenes and actually watch the building and brazing of a frame. Our frame builders and painter will be on hand to explain the processes and ask any questions you may have. The space is limited so you will need to RSVP in advance. Please do so at 527-4822.

Thursdays January 13 and 20 7:00-8:30 pm

Valid only with coupon. No cash value. Expires January 31, 1994.

R+E CYCLES RECYCLES

HELP SAVE THE PLANET

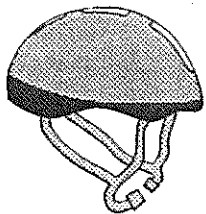

AND SAVE SOME MONEY

You no longer need to toss those old tires and inner tubes away to have them merely rot in a landfill. R+E CYCLES has contracted with a rubber manufacturer who will recycle our old rubber products by grinding them up to reuse them for floor coverings.

We will offer you fifty cents off the purchase of a new tire or tube when you turn in an old inner tire or tire.

One more reason for you to shop at R+E CYCLES.

FREE HELMETS!

R+E has purchased a new selection of test ride helmets and we are looking to offer our used test ride helmets to a non-profit organization that would find them of use. If you know of a group that would be interested in acquiring these helmets, please contact Estelle at 527-4822. First come, first served.

NEW FOR 1994 CO-MOTION TANDEMMS

Tandems are R+E's specialty. We are always watching and analyzing the new designs that occur in the tandem market. Comfort and handling are the 2 characteristics that we feel are the most important concerns when examining a tandem frame. Co-Motion, based in Eugene, Oregon has some hot tandems that fill the needs and demands of most Northwest riders.

Many tandems address the issue of torsional rigidity by using over size and heavy gauge tubing in the rear triangle, sacrificing comfort. Co-Motion's unique tubing specifications and frame design offer a comfortable ride not usually found in production tandems.

If you are considering a tandem, consider a Co Motion.

METALS AND MEDALS

For comfort or victory

Although new to R+E and Mountain Bike Specialists, our two most recent bike lines for 1994 have been around as long as we have. Gary Fisher Bicycles, a long time innovator in the bicycle industry joins R+E with its complete line of cross, mountain and road bikes, incorporating the latest in material technologies, and Mongoose, whose IBOC line of mountain bikes has been a regular on the podium at NORBA races for years, makes its debut with us in 1994.

From top to bottom, the 1994 Fisher bike line reflects the philosophy of head designer Gary Fisher, the acknowledged "father of mountain biking". From the ideal "first mountain bike" to the top of the line Super Caliber (the lightest production mountain bike frame in the industry at 2.84 lbs.), Gary has designed each bike to take advantage of the unique properties of the frame materials used. Both Fisher and Mongoose are unique within the bicycle industry in that they incorporate steel, aluminum and carbon fiber frames in their line. Fisher has designed each model to ride similarly, whether it's an entry level steel frame or lithium aluminum race frame, effectively creating a "Fisher feel" that transcends the line. Fisher has also introduced two race-quality road bikes this year, drawing on Gary's experience as a Cat 1 road racer. 1994 models are already at MBS with more on the way.

Mongoose 1994 cross, road and mountain bikes will make their debut at R+E the first week of December. Currently, Mongoose is perhaps best known for its AMPlifier mountain bike frame, the only dual-suspension bike ridden in NORBA/Grundig professional events in both cross country and downhill events. R+E will also be carrying the IBOC (International Bike of Champions) aluminum and composite road and mountain bikes, as well as Mongoose cross bikes for those who aspire to a more leisurely pace. Although a long-time producer of quality Cr-Mo frames, Mongoose has recently been putting energies into their proprietary bonded composite frame technologies, and in the process, is producing some of the lightest frames in the industry.

We are celebrating the arrival of Fisher and Mongoose bicycles by including a free baseball cap or Team T shirt to the first 20 buyers of each brand. Start off '94 on a new bike from Mountain Bike Specialists.
